

Year 4 Summer 1

In Reading into Writing, we will be reading then writing a folk tale. Then we will move on to exploring Myths and eventually having a go at changing a Myth with our own ideas. In GPS, we will be focusing on proofreading writing for errors. We will also be continuing to learn how to include fronted adverbials and complex sentences into our writing.

In Computing we have two units to complete. Firstly, we will complete some work on Online Safety. It is so important to keep repeating this unit, so that you can all remain safe online. Then we will be using and applying a programming system.

In PE, Laurel will be swimming every Wednesday. You must remember your kit every week. In school, Maple will continue their French and PSHE journey with Miss Stanbridge. In your second PE slot, you will be learning the rules and playing striking and fielding games such as cricket and rounders.

In PSHE, we will be looking at keeping safe (including online), having healthy relationships with others and rights and responsibilities.

It's a busy half term in Maths! We have three units to work through. Firstly, we will focus on equivalent fractions then adding and subtracting fractions. This will then move us on to exploring decimals. We will focus on tenths and hundredths. Lastly, we will look at telling the time and reading timetables. Why not be practising now at home? We will look at telling the time to the nearest 5 minutes and minute, as well as using the 12 and 24-hour clock.

In RE, we will be learning all about Islam. We will discover how Muslims live their lives and what teachings they follow and why those teachings are important to them.

In Design and Technology we will be learning about mechanical systems. Our focus will be on levers and linkages. During this journey, we will have chance to analyse existing similar products, decide on our own design to suit the needs of the user, make prototypes to see if our ideas work and then change things before making our final products.

In Science our unit is all about Animals including Humans. There are some super exciting experiments to look forward to with this unit. We will look at our digestive system; explain the different types of teeth and their functions. We will explore food chains, where we will name the producer, predator and prey within the chain.

In French, we will be looking at the weather.

You will be able to talk to a friend about what the weather is like and discuss the weather of different seasons.

In Music, we will be focusing on Egyptian and Arabian Music. We will be listening to and appreciating this genre of music; learning new musical vocabulary. We will also listen to music from great musicians and composers of Arabian music.
