

*As you're coming to an end at Boundary Primary School, we would like you to write down a fond/favourite memory at school. You could decorate it and make it unique. If you have more than one, then add them to it as well!*

Research information about your high school. Go onto the school website and learn about their philosophy. Write a fact file about it and perhaps something you're most looking forward to doing when you get there. Look at the clubs they offer after school too!

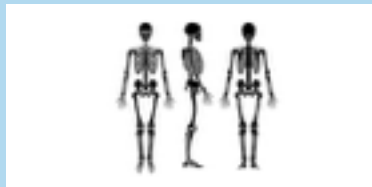

In Science, we're looking at how our body works: naming the main parts of the human circulatory system and the functions of the heart, blood vessels and blood.

### YEAR 6 BLT

### HOMEWORK TASKS

### SUMMER 2

Can you create an interesting fact file or diagram of the human circulatory system. Be creative - create a body model out of play-doh and label the main parts and what the function are.

In History we're going to be looking at Blackpool Heritage. Go and research some interesting facts about Blackpool. We have lots of history in Blackpool, from the Circus, Illuminations to the Tower. You can complete this on a computer as a presentation or as a book, 'All About Blackpool'.
